

# CORE-MATIC®

## NEW GENERATION Automated Coring Machine

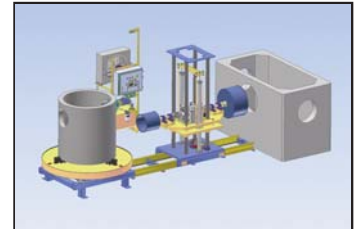

**Smarter, Faster, Safer**  
*“The New Standard in Productivity”*

**Basic Machine equipped with necessities for future upgrades (Uni-Directional Coring)**

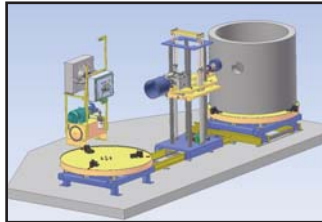

**Auto Machine with Single Spindle and Standard Turntable (Uni-Directional Coring)**

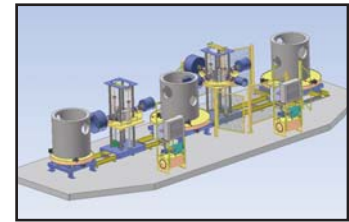

**Auto Machine with Standard Turntable and Dual Opposed Spindles (Bi-Directional Coring)**

**Auto Machine with Two Standard Turntables and Four Rotating Spindles (Bi-Directional Coring)**

**Auto Machine with One Offsetting Turntable and One Standard Turntable, and Dual Opposed Spindles (Bi-Directional Coring and Offset Hole Capability)**

**Multi-Coring Machine with TWO Auto Coring Units. ONE Offsetting Turntable and TWO Standard Turntables (Simultaneous Double Coring, Bi-Directional Coring, and Offset Hole Capability)**

### EVERY CORE-MATIC AUTO MACHINE INCLUDES:

- Heavy-duty dual rail frame design
- Control/power unit can be placed on either side
- High output hydraulic power unit with fan/radiator and 25 hp motor
- Heavy-duty gearbox with four speeds
- Coring capacity to 60" diameter
- PLC programmed for semi-automatic coring
- Cordless remote control with E-stop
- Safety barrier guarding
- On-site set-up and training
- Expandable, upgradeable design

### POPULAR OPTIONS:

- Choice of 60" and/or 90" turntables
- Multiple turntables, from one to four including the option to core two holes in the same structure at once
- Offsetting turntable for coring parallel holes
- Spindle carousel for 4-8 spindles
- Frame-mounted crane for handling bits
- Customization for unique requirements

## NEW GENERATION Automated Coring Machine

**Smarter, Faster, Safer**  
*"The New Standard in Productivity"*

### ---Smarter---

- Automatic bit retract
- Automatically detects & corrects "stuck bit situation"
- Readouts in both inches and metric units
- Modular design allows you to expand machine capabilities at anytime

### ---Faster---

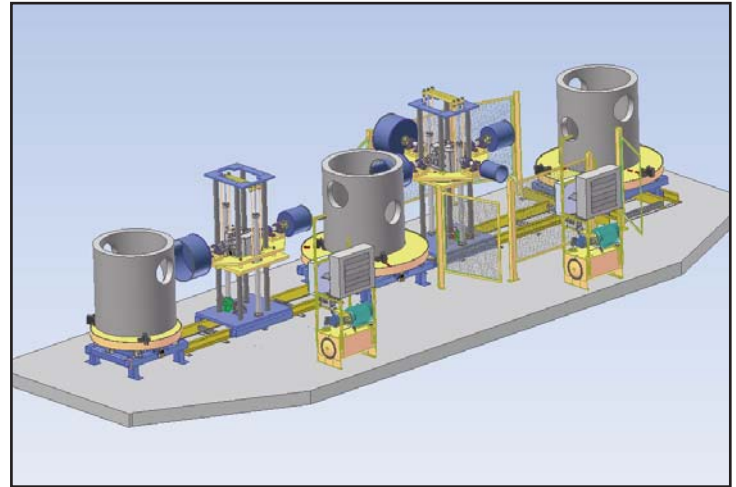

- Semi-automatic coring
- Automatic core pressure setting
- Built in encoder for precise drill carriage location at all times

### ---Safer---

- Cordless remote with E-Stop
- Barrier guarding added to address OSHA concerns
- No steps to trip on with floor mounted operator control panel
- Stand alone operator control panel mounts away from the machine
- Audible alarm sounds when carriage reverses direction

### Productivity Options

- Bi-directional coring
- Ability to core two straight through holes in the same structure at once
- Offsetting turntable for coring parallel holes
- Spindle carousel for 4-8 spindles

Multi-Coring Machine with TWO Auto Coring Units. ONE Offsetting Turntable and TWO Standard Turntables (Simultaneous Double Coring, Bi-Directional Coring, and Offset Hole Capability)
