

Product	Model	Data	Issue Date
EZ-STIK Sealant	All	Low Temperature Test	March 2008

4401 Page Ave., P.O. Box 457, Michigan Center, MI 49254

The material that is used in the EZ Stik product is tested to -10F per the ASTM C990 specification. However, the material is not brittle and will remain flexible at temperatures as low as -30F. The material will be firm and the tack level may feel lower but the material will not become brittle as do some asphaltic products .

Please call if you have questions.

Kathy Lamb
 Technical Manager, Sealants
