INSTALLATION TOOL

PRESS-SEAL GASKET CORPORATION

P.O. Box 10482, Fort Wayne, Indiana 46852

Phone: (260) 436-0521 (800) 348-7325 Fax: (260) 436-1908 E-mail: sales@press-seal.com Web: www.press-seal.com

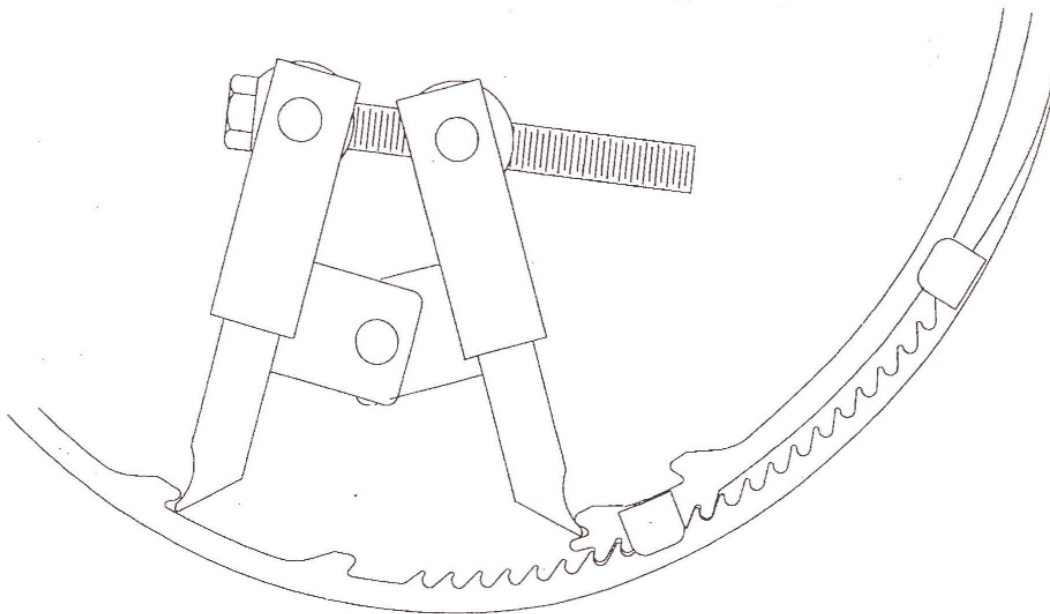

MECHANICAL INSTALLATION TOOL

Installation Instructions

1. Loosen tool bolt and collapse arms.
2. Insert tool arms so that short arm is under lower sleeve installation lube and long arm is under upper sleeve installation lube, as shown below. Installation is easier from manhole interior, as shown below.
3. Using the supplied box-end ratchet wrench, tighten bolt until visible compression of rubber boot is achieved. Rubber should gap approximately 1/8" on each side of sleeve when properly compressed.
4. Reverse ratchet and loosen bolt enough to remove from sleeve.
5. Do NOT reuse sleeve removed with this tool. Replace with new sleeve, relubricate, and reinstall boot.

NOTE: Protective Eyewear and clothing should always be used when operating installation equipment.

Tool & Sleeve as seen from Manhole Interior
(preferred installation method)
