

EMS: Environmental Policy

Environmental Policy

PRESS-SEAL GASKET CORPORATION is committed to protecting the environment and improving the quality-of-life for its employees, customers and the PSG community. We will accomplish these objectives by adhering to the following guidelines:

- Commitment to safe operation to protect the employees, the community and the environment.
- Commitment to continual improvement in activities, processes, products and services to improve plant operation and protect the environment.
- Commitment to preventing pollution by recycling materials, reducing waste, and disposing of remaining waste in an environmentally sound manner.
- Commitment to comply with all relevant state, federal, local, and applicable international environmental agreements, laws, and regulations.
- Commitment to evaluation of operations at least annually to revise environmental objectives and targets and ensure their continued alignment with the environmental policy and priorities.
- Commitment to communication of the environmental policy to employees and community to ensure objectives reflects the concern of others.
- Commitment by management to provide the necessary resources to accomplish the environmental objectives and targets.

The Environmental Management System (EMS) of Press-Seal Gasket (PSG) applies to all activities of PSG occurring at 2424 West State Boulevard, Fort Wayne, Indiana, including design, engineering, development and manufacturing of products including rubber, plastic, and metal parts for the construction and other industries. Products include connectors, gaskets, and fasteners for storm, sanitation, sewer, rail, tunnel and precision metal machining.
