What It Is

The 8QRS PSX: Direct Drive provides a simple method for installing small diameter pipes into manholes or other structures.

The unique design of 8QRS allows it to be easily adapted to 1-1/2” to 4” (38 – 100 mm) PVC pipes, either in the plant or in the field.

The reliable tempered series 304 stainless steel power sleeve allows for easy adjustment in almost any 8” cored or cast hole for a watertight connection.

How It Works

- Sections are cut off to adapt to different PVC pipe sizes.
- The connector fits into a cast or cored hole.
- A power sleeve made from tempered series 304 stainless steel expands with a certified installation wrench.
- Take-up clamps made from series 304 stainless steel with quick adjusting screws secure the connector to the pipe.

Why It’s Better

- Adaptability to a range of PVC pipe sizes all in one connector.
- Safely install the connector from the outside of the manhole.
- All stainless-steel components with no welds or rivets creating a stronger product.
- Precision molding provides accurate compensation for hole size variations.
- Contractor can save time and money by backfilling immediately.

8QRS PSX: Direct Drive is available in Oil-Resistant Nitrile rubber.
