

# PREMIUM MANHOLE CORE DRILL BITS

Rock-Weld has been manufacturing the highest quality core bits for the precast manhole industry since 1987.

Rock-Weld will custom design a specific segment for you based on the aggregate and sand you are using for the lowest possible cost per hole.

Rock-Weld premium manhole core drill bits are specifically designed for the precast manhole and structure manufacturing industry.

- Standard core bit sizes range from 2" - 48" in stock for quick delivery.
- Manhole core bit adaptors available in: "A" flange to 1 1/4" - 7 and 1 1/4" - 7 to "A" flange.
- Custom sizes available upon request.
- Save more money with our re-segmenting program. Ask your territory manager for details.
- Long lasting bit life with faster coring times.
- Two-speed electric portable manhole coring machine rig for 2" - 18" core bits.

Rock-Weld will resegment your used core bit barrels. We will schedule the pickup and email or fax you the completed bill of lading. The core barrel's just need to be secured to a pallet and we'll take care of everything else.

*A user friendly portable manhole coring system*
