

SPRAY ADHESIVE

GENERAL PURPOSE ADHESIVE SPRAY

What It Is

Our general purpose Spray Adhesive is a fast drying, super strength adhesive for bonding rubber to concrete and other substrates.

The rubber cement is conveniently packaged in aerosol cans making it easy for contractors to use in the field.

How It Works

- Clean surface that adhesive will be applied to.
- Use a web pattern motion to ensure coverage.
- Allow to sit for 1-3 minutes and then press rubber onto adhesive covered area.

Why It's Better

- Specially formulated to bond rubber to concrete.
- Eliminates brushes or rollers.
- An adjustable nozzle for different spraying applications.
- Fast drying.

Where To Use

- Manholes
- Wet wells
- Square pump and lift stations
- Stormwater structures
- On-site treatment structures
- Junction chambers
- Grease interceptors
