

# PSX: NYLO DRIVE

## 8QRS Nylo Drive MULTI-SIZE

### What It Is

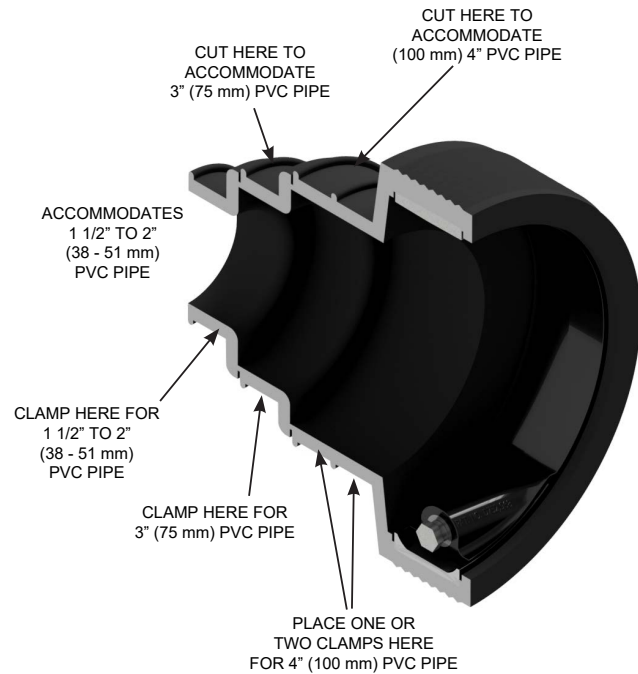

The 8QRS PSX: Nylo Drive provides a simple method for installing small diameter pipes into manholes or other structures.

The unique design of 8QRS allows it to be easily adapted to 1-1/2" to 4" (38 – 100 mm) PVC pipes, either in the plant or in the field.

Whether you core or cast your holes, 8QRS PSX: Nylo Drive fits right into your production methods, ready to seal your toughest applications every time.

### How It Works

- The connector fits into a cast or cored hole.
- A power sleeve made from reinforced nylon polymer with stainless steel threaded inserts embedded in the expansion mechanism expands with a certified installation wrench.
- Take-up clamps made from series 304 stainless steel with quick adjusting screws secure the connector to the pipe.

### Why It's Better

- Safely install from outside of the manhole preventing falls from crawling down into structures.
- Expansion mechanism components are made entirely of stainless steel threads.
- Precision molding provides accurate compensation for hole size variations.
- Additional torque and multiple adjusters on larger diameters.
- Contractor can save time and money by backfilling immediately.
