

STRAP WRAP™

PART OF THE EZ WRAP™ PRODUCT LINE

Strap Wrap is a coupler for joining pipes of the same size.

WHAT IT IS

Strap Wrap is designed to join similar pipe types to other pipes in the field. A mastic layer provides a connection, while a woven layer protects the wrap from tears or punctures. Clamps and ratchets are available for securing the wrap to the pipe, and they can be adjusted easily. A closing flap is designed to cover the clamps at the end of installation, providing them with added protection.

WHY IT'S BETTER

- Premium quality ratchet straps to secure with confidence
- High-quality 304 stainless steel for durability & longevity
- Meets the material requirements of ASTM C877 Type II
- Effortless installation in minutes
- Fabric material that is built to withstand tough conditions
- Soil and water resistance for lasting performance
- Prevents infiltration & exfiltration providing reliable protection

PERFORMANCE

- ASTM C 877: Standard Specification for External Sealing Bands for Concrete Pipe & Manholes
- ASTM D 1244: Standard Test Method for Concrete Sewer Manholes by Negative Air Pressure (Vacuum) Test Prior to Backfill.
