

PSX™ Multi-T

THE PREMIERE SERVICE TAP

WHAT IT IS

PSX: Multi-T is an innovative lateral connection solution for corrugated HDPE/HDPP Pipes. Featuring a specialized rubber sleeve designed to match the internal radius of your pipes, our 3-part system with a unique anti-over insertion design allows for seamless tapping of existing lines, ensuring precision and reliability in every connection. Upgrade to PSX: Multi-T for unmatched ease and accuracy in your lateral connections.

3-Part System Includes:

- Rubber sleeve
- PVC Hub
- Rubber gasket for incoming pipe

WHY IT'S BETTER

- Simplified inventory with a single sleeve to cover mainlines from 12"-60".
- Error-free installations to complete projects on time.
- Eliminate risk of over insertion.
- Leak free installations for reduced maintenance costs.

Hole saws sold separately.

PSX: Multi-T is a patent pending solution for corrugated HDPE/HDPP pipe installation that simplifies your inventory and designed to make installation simple.

AVAILABILITY

MULTI-T LATERAL TAP	HOLE SAW SIZE	MAINLINE PIPE RANGE
